It makes the relationship system more realistic by adding more variables as to how two Sims get attracted to each other, other than some random numbers or skills.. Even though it is a fairly old game, these mods can make the game feel fresh again for you and fix a lot of the annoyances that the native game came with, enhancing your experience.. The mod contains tools for managing every Sim in your town manually You can form relationships, customize households and change your Sims' job etc.. With this mod, it allows that dream to become a reality for your sims, by adding a ninja career to the game.

10 Apartment modWith the Aparment mod, you can set up more than 1 family in one lot without the need to manage them all at once.. While this balances things out and encourages you to play with multiple Sims, it gets boring quick and your Sims feel shallow.
